FOR IMMEDIATE RELEASE

WSA Issues Boil Water Advisory for Portions of Lithia Springs

DOUGLAS COUNTY, GA – November 22, 2026 – The Douglasville-Douglas County Water and Sewer Authority (WSA) has issued a Boil Water Advisory for portions of the Lithia Springs area following a water main break that resulted in low water pressure or service disruptions.

Repair crews are actively working to complete the repair and hope to have it finished tonight. The break is located at a creek crossing which makes access challenging. The affected area has been isolated, customer outages are minimal, and the water system remains stable and is recovering well.

As a precaution, customers who experienced water outages or reduced water pressure should use boiled or bottled water for drinking, cooking, food preparation, brushing teeth, and other consumption-related activities.

The advisory will remain in effect until testing confirms the water is safe. WSA will notify customers once the advisory is lifted. For additional information, please contact WSA Customer Service at 770-920-3823.
