FIRE FLOW TEST APPLICATION

A Fire Flow Test is required for all projects. A Fire Flow Test cannot be over 1 year old. Fire Flow Test results must be shown on the water plans. Construction plans will not be approved without the Flow Test results being shown on the plans.

It may take up to three (3) weeks to complete the Fire Flow Test, depending on weather and other factors. Please consider this when preparing your development schedule.

To order a Flow Test **all** of the following must be completed:

1. Complete the form below.
2. Attach an 8 ½ " X 11" location map. Your site (**parcel**) must be clearly shown on the map. A star marking the location is not sufficient.
3. Pay \$100.00 fee. Payment may be made by the methods below:
 - A. A check payable to the Douglasville-Douglas County Water
 - B. Visa or Mastercard (Call 770-920-3823 to charge by phone)

Your application cannot be processed and the Flow Test performed unless **all** of the required information is provided *and* the site is clearly shown on the location map.

(PLEASE PRINT)
